

Meet your students where and when they need you most—on their journey.

Connect more of your campus-wide data for valuable insights. Identify the most effective programs, uncover at-risk students and match each one with the best resources to support their journey however and whenever they need it.

Key Capabilities:

Robust proactive assessments and predictive analytics

Advisor-centered functionality to manage individuals and cohorts

Collaboration capabilities for faculty and advisors

Flexible early alerts to involve the right support

Student relationship management to deliver resources or keep in touch

Visualizations and dashboard analyses to drive impact

Anthology Beacon in Action

“We’ve made tremendous inroads in breaking down silos and creating a collaborative team approach to supporting individual student needs, while also doing it in a systematic way so that our decisions are driven by data versus anecdotal evidence.”

Judith Redling

Associate Provost Academic Affairs,
Drew University

Get to know your students earlier

Anticipate risks using proactive assessments and develop more impactful intervention strategies with powerful data analytics and insights. Use our institution-specific predictive modeling to evolve risk scoring and identify key factors to maintain a consistent influence on student success.

Have the right tools on hand

Give your advisors everything they need with customizable dashboards, comprehensive profiles and actionable views to better understand which students need support and when.

See a comprehensive view of the student

From academic performance to co-curricular involvement to noncognitive skills, your advisors can have a clear snapshot of each student. Using recommendations and automatic insights, you can highlight patterns across the student journey that aid in your student success strategy.

Build meaningful connections

A connected success network allows the right people to focus on key student interactions that make all the difference.

Broaden your success strategies

Tie in cohort-level information with additional datasets to identify new opportunities. See which demographic groups need help, understand the impact of support changes and share visualizations with key stakeholders to show the positive impact of your student success strategy.
